

CHARLIE WILSON, PH.D.

Washington D.C. • (917) 763 5712 • charliekwilson@gmail.com • linkedin.com/in/charlie-wilson-dc

I work in research and decision-support roles where complex financial, economic, and policy questions require judgment as much as analysis. Over the past 20 years, I have led investment and research teams and supported senior decision-makers by clarifying risk, pressure-testing assumptions, and grounding strategy in evidence across global markets. I use advanced analytics and applied AI as tools to improve clarity and reliability, and I have spent much of my career aligning analytical work with organizational priorities and constraints.

WORK EXPERIENCE

UBER AI SOLUTIONS

Uber AI Solutions is an applied analytics research group focused on evaluating AI-enabled decision tools in complex institutional and operational environments.

Applied Analytics & Model Evaluation

12/2025 - Present

- Contribute applied analytics and model evaluation expertise to support reliable, interpretable AI-enabled decision tools used in complex institutional settings, with a focus on real-world decision-support use cases.
- Assess and improve AI-enabled analytics by identifying failure modes, evaluating data alignment and quantitative accuracy, and analyzing where and why models succeed or fail, emphasizing methodological rigor, traceability, and decision reliability.

THORNBURG INVESTMENT MANAGEMENT

Santa Fe, NM

Thornburg is a Santa Fe-based asset manager with ~\$50B in AUM known for its global investment focus and high-conviction investment approach rooted in deep fundamental research.

Portfolio Manager, Managing Director

01/2014 - 05/2025

- Led global market and competitive analysis across energy, semiconductors, industrials, and technology, integrating company fundamentals with macroeconomic, policy, and geopolitical factors to inform long-horizon investment decisions.
- Conducted primary and secondary research including management interviews, supplier and customer discussions, industry experts, financial filings, and technical documentation across global markets.
- Built forecast and scenario models for earnings, cash flow, and valuation, incorporating demand growth, supply constraints, regulatory risk, and cost of capital.
- Synthesized technical, market, and policy information into concise decision memos to support investment decisions.

Director of Research, Managing Director

09/2019 - 01/2021

- Standardized the equity research process across teams by implementing a common analytical framework, improving consistency, comparability, and decision readiness of research outputs.
- Developed and deployed a shared research platform supporting idea generation, deep-dive analysis, and ongoing coverage, increasing data reuse, transparency, and cross-team collaboration.
- Embedded structured ESG and SASB-aligned metrics into the core research workflow, integrating qualitative assessments with quantitative analysis rather than treating sustainability as a standalone overlay.
- Established research governance practices to evaluate analytical quality, model limitations, and documentation standards, balancing rigor with timeliness and usability for senior decision-makers.

Associate Portfolio Manager

05/2012 - 12/2013

MARSICO CAPITAL MANAGEMENT

Denver, CO

High conviction public equity manager known for deep research and concentrated investment portfolios. Recruited for scientific training and rapidly built broad sector fluency, expanding from energy and materials into payments, technology, and healthcare.

Senior Analyst, Partner

10/2007 - 04/2012

- Conducted in-depth market and competitive analysis across energy, materials, agriculture, and other capital-intensive sectors, developing detailed understanding of industry structure, cost curves, and business model economics.
- Built and maintained financial and operating models to forecast earnings, cash flow, and valuation, incorporating commodity pricing, input costs, and macroeconomic assumptions.

Equity Analyst

01/2006 - 10/2007
